Narayan,

I am sorry to revive this since I think the privacy problem and danger to my life and person persists. This evening I was almost knocked down by an auto while walking down the service lane of outer ring road. Luckily I swiftly moved to evade an injury (Auto - Registration No :KA 03 9083 Date: 18 June 2008 around 5:30 PM). I do not think that this happened accidentally since the auto driver was adamant and pleaded not guilty. It was a deliberate work of provocation and injury to my person. It deserves a harsher look . Things like this do not crop-up out of the blue.

Sometime back in January I was forced into an altercation with a TATA Safari which tried to hit me almost, while was out of station in my home town - (Registration : TN 50 F7 - some day in January - around 7:30 PM)

This is a second encounter of such kind. I would like to bring it to your attention. I will be taking this seriously from now on and thinking of legal remedy.

regards
Shrinivas Kannan

Shrinivas,

Like I said on Friday, don't get me wrong on this. Contrary to general perception, there is nothing wrong with consulting a psychiatrist for stress, anxiety and related problems. Since you have been going through this for the last one and half years, I made this suggestion and encouraged you to consult one. If you are confident that you can put this behind and not worry about it, I'll be more than happy.

Regards,

Narayan

Subject: RE: FW: Legal Notice regarding e-mails I sent from 1999 to 2006

Narayan,

I thank webMethods for this gesture.

Yes. I underwent a brief bout of anxiety due to the hack/phish/e-mail leak/misinterpretation of my blogs and the events following it (e.g few people trying to assault me). These are sufficient circumstantial evidences to pursue this as a criminal litigation on the grounds of hacking and breach of privacy (I can file an RTI too for ISP records). But I would try to magnanimously forgive and forget who committed this.

But this mental anxiety does not require a counseling from a (psychiatrist?) doctor as of now since I am a yoga practitioner and I know how to deal with this. I had to complete legal formalities and put things on record to prevent any defamation against me and misuse of my e-mails with malicious intent since, as I had already broadcast, I was doing an astrology research for 11 years(1995-2006). I would like to consider this as closed since I do not want to waste my time on it. In future if any problem arises, I will be forced to revive this. But I would not be actively pursuing any longer.

Shrinivas,

As I mentioned in our discussion earlier today, I encourage you to seek professional counseling. The company can bear the cost of the initial counseling sessions. Here is the contact for one of the doctors, but you can consult anyone else of your choice.

Dr MJ Thomas at Sagar Apollo Hospital, Jayanagar 4th T block.

Ph: 26536700 for an appointment

Let me know if you need any help from side.

Thanks,

Narayan

Shrinivas,

The last time we spoke on this issue in January, you had said that you don't think any intrusion to your privacy is happening in the office. Do you now believe that's not the case anymore? We even had IT scan and check your machine for virus activity and any adware or spywares running on the system and found no such activity on your desktop.

Regarding the response on the privacy statement you have asked for, neither Padma nor I are authorized to answer this. We have forwarded this to HR and Legal departments for a formal response in this regard.

Subject: RE: FW: Legal Notice regarding e-mails I sent from 1999 to 2006

Padma/Narayan,

Pursuant to my mail below (for which I received no replies), I feel that intrusion in my private life persists (including but not limited to surveillance of my personal e-mail accounts and internet activity). Still strange as it might sound, I felt that my thoughts were/are read (through supposedly paranormal ways – atleast I do not know a scientific method of thought reading; I even had few weird dreams – these things are not usual).

I do not understand the motive behind all these. As of now it looks unwarranted and provocative and done with an intention to flaunt an ability to put me under a "state of mental confinement without traces of proof". (Proof will find its way through the follies of perpetrators). Anyway it is a human rights violation. I would like to avoid a future situation of tackling this legally.

I have obtained a written commitment from my ex-colleagues and classmates that they are not party to this and they have not done this playfully. I would like to ask a question and get Yes/No reply from webMethods(Software AG) on the following:

Did/Does webMethods intrude my privacy either electronically or otherwise (e.g using keyloggers, bots or other spyware, but not limited to these) and distribute my network activity to a wider audience (politicians , media for example) or does it have a knowledge of such a privacy violation? If yes, why was this done and does it continue still?

This is a legal formality done to preserve my privacy. I hold it greater than anything else. As below I have requested Sun Microsystems for a legal advice on this. I have received no reply yet from them. I have not received reply from Cyber crime cell also.

Thanks

Hi Jonathan,

I am an ex-employee of Sun India Engg Center, Bangalore (from Feb 2000 to July 2005). My employee id at Sun was 104440 and e-mail : kannan.srinivasan@sun.com. I need some legal advice regarding a potential cyber crime. I did not get any contacts from Sun Legal department. So I have to escalate this to you. I apologize for taking up your precious time. I have CC-ed two ex-colleagues of mine at Sun for reference.

Brief description of my problem:

I feel that few of the confidential e-mails I had written to Sun colleagues's official ids (including those CC-ed above) and Sun internal mailing lists, during my stint at Sun from 2000 to 2005, have been leaked out to people outside without my knowledge. I want to bring it to your kind attention. I don't have any idea of how this happened and for which purpose. If this had happened with a good intention to give me exposure, I am happy but I am unable to still reconcile to that.

I have given a cyber crime complaint with local police. I need to worry about this since this has given rise to a surveillance and privacy problem for me which could be dangerous and harmful to my freedom (Please go through the mail thread below if you have time). Few of those e-mails were part of my astrology and inference algorithm experiments which I was individually pursuing from March 1995 to December 2006. I have to explain this publicly since I feel those e-mails could have been misused and misinterpreted by few people.

[Aside: I also have a strong feeling that my personal e-mail ids (Gmail and Yahoo) and my personal laptop could have been compromised.]

I do not want to make this longer. This is simply a personal request to you to investigate this. I have great regard for you and Sun.

Thanks

Shrinivas Kannan

To: Staff-Bangalore <Staff-Bangalore@softwareag.com>

Cc: shrinivas.kannan@gmail.com

Hi,

Sorry for wider distribution. But I felt I have to publish this legal notice since my personal e-mails sent to mailing lists and individuals, which were part of my astrology and inference algorithm research have been distributed globally without getting prior consent from me. I am also seeing few surveillance issues for more than a year. I feel that someone is tracking my movements through a hidden camera (even within my house). [Sounds weird, doesn't it? Still wondering how that happens – through an optical character recognition from satellite? I don't know.]

Looks like I have been a target of planned character assassination and vilification by few vested interests and vicious people. I have given a complaint to cyber crime cell since there was a hack on my personal laptop too around December 2006.

Appreciate your help in resolving this and I vow to nail whoever committed this ghastly act.

Regards

----- Forwarded message -----

From: **Shrinivas Kannan** <shrinivas.kannan@gmail.com>
Date: Jan 6, 2008 8:57 PM
Subject: Legal Notice regarding e-mails I sent from 1999 to 2006
To: Sankara Rao <bsankararao@gmail.com>, Shubho Sengupta <shubho@gmail.com>, Karthikeyan D <karthikeyan.d@gmail.com>, Sivasankaran R <sivasankaranr@yahoo.co.in>, Asokumar Shanmugam <asokumar@gmail.com>

This is to inform that the non-official e-mails I sent from 1999 to 2006 from my GMail/Yahoo accounts and from official id(s) to individuals(including you) and mailing lists **are part of my inference algorithm and astropsychoanalysis experiments** which I was pursuing in the past **from March 1995 to December 2006**. The contents of those mails do not mean what they mean on first look and they were steganographically encrypted graph data structures done out of creative curiosity. Any seemingly extremist emotions conveyed through those e-mails against an individual or group of individuals were part of my inference algorithm experiment to present a logically valid (but unpopular) viewpoint for/against an individual who is perceived to be unpopular/popular respectively. I practiced this as part of my effort to be a neutral critic.

From August 2005 to March 2006, I started to get a mild feeling that my e-mails were being leaked outside to a wider audience (it could have happened earlier too) and some spying. I started to do some spamming from March 2006 to find out what is happening. This feeling got stronger in December 2006 when there was a phish attack through Yahoo IM worm and a hack on my laptop. So I suspect my e-mails have been leaked/reproduced electronically and/or otherwise(e.g hard copy) without obtaining prior written consent from me required for a confidential conversation through a phish and/or through a manually coordinated multi-threaded forward exercise. I consider this as a breach of confidentiality and privacy supposedly done with malafide intention given few incidents that happened during past one year.

I have given a complaint to this effect with Cyber Crime Cell (refer my complaint forwarded to you) since this issue seems to be snowballing into a surveillance and privacy problem. I have forwarded an e-mail sent to my batchmate hereunder. Go through it (if you haven't already received it through other means).

Whoever received my e-mails sent during above time frame(1999-2006) is strictly advised to take the contents there-in with a pinch of salt and not to present a distorted meaning to them(e.g as Libelous, as an act of Extremism and Sedition against Union of India, Vigilantist etc.,). I am not responsible for perverted meanings understood by the reader- Caveat Lector. They are also prohibited from distributing my confidential e-mails either electronically or otherwise(e.g hard copy) without prior written consent from me , failing which would entail criminal legal action including a defamation suit. I already suspect some systematic distortion of facts has happened driving me to take this matter with top priority and plug any privacy hole.

Please read through the legal disclaimer at the end of this e-mail which declares any distribution of my e-mails without my authorization illegal. This is necessitated due to unsavoury incidents in the past .I wanted to formally send out this legal notice since I did not have any disclaimers for my mails sent during the above time frame(1999-2006) which could feed misrepresentation of facts and smear campaign.

Recipients of my e-mails(sent from my all personal ids) are hereby advised to get a prior written consent before reproducing/distributing them electronically or otherwise (e.g hard copy) since that would save lot of time for me and you too and prevent any bitterness and bickering.

regards

Shrinivas Kannan

Subject: Re: [95cse] Re: Request to Cyber Crime Cell - Regarding possible hacking of my GMail account and leak

To: Naveen PaulKandasamy <naveenpk@yahoo.com>

Hey Naveen,

I am not writing software to root out corruption ;-) Corruption is part of life. It is not feasible to eliminate it, we need not eliminate it rather - it would do a self-destruction. A corrupt system will collapse due to corruption. Just stand aloof from it, relax, enjoy the implosion unfold before your eyes and sleep peacefully. Nature is programmed to be self-regulative, like Tsunami wiping out half a million lives in few hours :-)

I was just blogging as part of my astropsychanalysis and inference algorithm experiments. I was experimenting with astropsychanalysis and inference algorithm for the past 12 years (from March 1995 to be precise) even before joining college. I even wrote (graph-like) connected mails using this for the past 8 years. Looks like I should have added a disclaimer to all my mails explicitly stating this (but that jeopardises the intent of analysis, doesn't it?). I have stopped experimenting it. But hopefully I might try to write some software in astronomy/astrology in future if Almighty permits. Yes, the maya - the matrix - is indeed what we think to be real probably with multiple levels.

>> on a lighter side, btw, you are not writing software to end corruption or something,
>> which might have gotten the govt to spy on you as "their" enemy, right ? ;-)

Hey what are you saying? Is the government spying on me? Or did they distribute my mails world-wide? Which government? Indian government or US? Censorship or something like that? That is really a news to me. Thanks for throwing some light. So, do you have some information on this? Just curious to know. If governments are doing this, I am really puzzled as to what prompted them to do that. I am a peace loving individual minding my life, why would a government worry about me?. I think the government (either US or Indian) is mistaken, if they are doing surveillance. They could have called me for some interrogation [if they had not already done that using their brain wave analyzers or a truth serum test :-)] or sought some explanation from me. I would have explained this. They need not do this to me. This is hurting and I feel victimised. I request them to stop this unnecessary waste of time and money. Better channel their assets in some useful way :-)

People do not take things sportively - that is the problem. Looks like I should have added a legal disclaimer to my blog shrinivaskannan.blogspot.com and yaska.blogspot.com stating that it is an astrology and inference algorithm experiment and the contents of the blog do not mean what they mean on first look. I never thought that this will take such a vicious turn. Things went astray.

Yeah, I am yet to be married, just like you, working in webmethods' Broker Server team (messaging software).

All the best for your life.

regards

Subject: Re: Request to Cyber Crime Cell - Regarding possible hacking of my GMail account and leak

To: cbcyber@tn.nic.in

Cc: covdnhr@nic.in, ionhr@nic.in, supremecourt@nic.in

Sir,

This is pursuant to the e-mail I had sent on 19 September 2007 regarding the possible hack and leak of my G-Mail accounts (shrinivas.kannan@gmail.com and ka.shrinivaasan@gmail.com) and my laptop which has a DataOne Broadband connection. (Please refer my mail below).

I wish to lodge this as a complaint since I feel there is a planned surveillance going on around me including tap of my personal phone numbers (0435-2403069, 9980268193 and 9789346927), my e-mail accounts(shrinivas.kannan@gmail.com, ka.shrinivaasan@gmail.com) and tracking of my movements possibly through human and/or electronic methods (e.g hidden camera etc.,). So put together there is a coordinated human/electronic surveillance on me the reason for which I am at loss to

understand. I also do not know who are doing it.

To prove that my e-mails have been leaked and a hack has happened requires ISP records and logs to be analyzed which I do not have access to.

Though initially I did not have a chance to take this seriously due to preoccupation with my busy job schedules, of late I tend to get an impression that this is a scientifically coordinated spying/surveillance with a malafide intent. I am unable to neglect it as a frivolity.

I have complained to AirTel about this (please find attaced). This surveillance seems to be happening for quite some time - possibly from March 2006 or even before that. This feeling intensified in December 2006.

I would also like to add an incident in October 2007 when few unidentified people (they looked like teenagers) tried to assault me while I was walking down my street in Kumbakonam and enquired about few of my personal e-mails which they had no chance of knowing .So I feel that this is more than a surveillance - it is a threat and challenge to my privacy.

In addition to the above I also suspect that few/all intended recipients of my confidential e-mails might have distributed my confidential e-mails without obtaining prior consent from me, with a malafide intention to threaten and malign.

Please register this as a formal complaint of breach of privacy and confidentiality. I am CCing NHRC and Apex Court.

I kindly request you to look into this as a complaint.

regards

Official e-mail: shrinivas.kannan@webmethods.com
Official phone number : 080 - 40104796

Dear Sir,

I am a software professional working in webMethods India Ltd (now named Software AG), Bangalore.

I was working from home in Kumbakonam connecting to my Bangalore office through VPN during October 2006 - December 2006. I am having DataOne broadband connectivity at home (port bound to phone number 0435-2403069 - shrinvaskannan@dataone.in). During this time, I received a Yahoo Worm with a hyperlink which I had clicked unawares since it was showing Yahoo id of my colleague(possible spoofing).

Around the same time in December 2006, I felt that my mails in personal gmail ids (shrivas.kannan@gmail.com and ka.shrinivaasan@gmail.com) were leaking outside. This leak, I feel, is happening supposedly for the past 9 months since December 2006 and still continuing. I do not have any idea on who and why they are doing it. Also I do not have any proof to present to you except the strong feeling that my mails are leaking outside. It needs lot of technical data to be analysed to prove this for which I do not have any access or expertise. I also do not know if the Yahoo worm mentioned above has caused this. I have complained to BSNL and GMail(Google) about this(please see the attachments).

Hence, I kindly request you to please look into this issue since it is a privacy violation. I do not want to lodge this as a formal complaint since it could be frivolous attempt too by few people (I do not want to spoil their life) but I want to bring it to your notice since it comes under Information Technology Act (sections 66 and 72 below):

Section 66	Hacking with computer system:
	Whoever with the intent to cause or knowing likely to cause wrongful loss or damage to the public or any person destroys or deletes or alters any information residing in a computer resource or diminishes its value or utility or affects it injuriously by any means, commits hacking.

Section 72	Breach of Confidentiality and Privacy:
	Any person who, in pursuance of any of the powers conferred under this Act, rules or regulations made there under, has secured access to any electronic record, book, register, correspondence, information, document or other material without the consent of the person concerned discloses such electronic record, book, register, correspondence, information, document or other material to any other person.

I have attached the security alert I raised to Google and complaint given to BSNL.

Thanks and Regards
Shrinivas Kannan
